

# ***TAR Company Policy***

**At TAR our primary objective is to reach the highest levels of achievement in the field of Auto Recycling. 'To be the best at what we do'**

The Company is committed to developing and maintaining management standards that will enable it to implement "Best Practice" processes and drive continuous performance improvements in relation to quality, occupational health and safety and our environmental sustainability.

TAR has established a Management System in line with the requirements of International Standards ISO 9001:2008, ISO14001: 2004, AS4801: 2001 as the foundation and framework of its business.

By adopting this strategy we aim to achieve the following objectives:

- Increase our business performance by enhancing the effectiveness of our internal key processes.
- Seek to satisfy the needs of our clients and expectations of the community at large without making commitments we can't meet.
- Set reasonable targets to gauge our performance.
- Carry out regular compliance audits and reviews of the system to check its effectiveness, ongoing relevance and stimulate process improvements.
- Create disciplines that will prevent problems, rather than simply correct them after they occur.
- See that mistakes are analysed and used as opportunities to improve.
- Comply with all applicable laws, regulations and standards and where adequate laws do not exist, adopt and apply standards that reflect the company's commitment to quality, health and safety and preventing pollution.
- Involve employees in the improvement of quality, health, safety and environmental performance. Ensure that we all are informed and trained to meet our objectives and take pride in our work.
- Work cooperatively with industry, government & the community by developing innovative solutions and set achievable standards for the Auto Recycling Industry.
